DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 01/10/2005 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 7, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Clarke et al.

The reasons for this rejection are set forth in the last Office action.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
6. Claims 4-6 and 10-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Clarke et al.

The reasons for this rejection are set forth in the last Office action.

Response to Arguments

7. Applicant's arguments filed 01/10/2005 have been fully considered but they are not persuasive. Applicant argues that the claims now require that the photo-induced charge movements consist of isometric change or the ejection of electrons, protons or OH⁻ ions. However, the pyroelectric response measured in the method of Clarke et al would inherently have included at least the ejection of electrons or protons. It is not seen how applicant's new language provides any further limitation beyond the electrical response detected and analyzed by Clarke et al. Applicant further argues that Clarke teach the reagent being coated on an electrode, which in turn is coated on the polymer, rather than being adsorbed onto the polymer. However, the language of the instant claims does not preclude the embodiment of Clarke in which the reagent is adsorbed onto the polymer by means of an intermediate electrode.
8. This is an RCE of applicant's earlier Application No. 10/005717. All claims are drawn to the same invention claimed in the earlier application and could have been

finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
